Design:
Good Design Techniques – CRAP. Alt and title attributes for each image ✓

Many Media Queries
– I want this project to be very "Mobile Friendly"
Your individual project must look good on my IPhone and my IPad, and my desktop.
If you can please do not reference pixels in any of your positioning.

Organization of information – text and graphics make sense – logical – use the CSS float property
for some images. ✓

Content
 interesting read, excellent grammar, perfect spelling. ✓
 Please do not make the content of text on the inside pages short. ✓
Try to keep the first page (index) to one screen ✓
            -    no scroll bars. ✓
Navigation – easy to get around, intuitive, well labeled ✓

Use of HTML5 and CSS3 (both text and positioning) Valid HTML 5 and Valid CSS3 –
You must have some JavaScript. ✓
    -    Modify exercise 4 Change:
    -    background color ✓
    -    the radio button content to ✓
    -    Must have slideshow ✓

Reference Provided ✓

Must have a Footer. In the footer please have a link to
www.validator.w3.org and evaluates the current page. ✓

display that you have written structured **valid CSS** with no syntax errors and no warnings. ✓
Do NOT use BOOTSTRAP in this projet ✓
